## ABOUT ME

I am a curious and proactive person with a strong interest in continuous learning in technology. I stand out for my dedication and attention to detail in every task I undertake. I have the ability to work both individually and in a team, and I maintain a high level of concentration, which allows me to be productive in any environment.

## PROJECTS

- **Airline Management Project** : Flask, React, MySQL

Developed a web application for managing airline operations, including flights, airplanes, destinations, passengers, luggage, and ticketing, using a CRUD system. Implemented business rules like seat allocation and flight capacity validation.

- **Wholesale Business Management**: Flask, React, MySQL

Developed a system for managing a wholesale business, including vendor, buyer, product, and sales data. Managed business rules and stock control. Implemented user account management with admin and user roles, with a secured frontend tailored to each user type. Implemented user authentication and role-based access control.
